

MD. KAMAL HOSSEN

PHP & LARAVEL DEVELOPER

Dhaka, Bangladesh | +880 1868 799280 | flkamal2016@gmail.com

Portfolio: devkamalhossen.online | GitHub: github.com/devkamalhossen | GitLab: gitlab.com/devkamalhossen

PROFESSIONAL SUMMARY

PHP & Laravel Developer with **5+ years of professional experience** developing, maintaining, and improving web applications using PHP, Laravel, MySQL, and JavaScript. Strong practical experience with MVC architecture, RESTful API development, database design and query optimization, Laravel Filament, Eloquent ORM, Blade templates, validation, authentication, routing, middleware, jQuery, and AJAX. Experienced in ERP, inventory, POS, eCommerce, FinTech, SaaS, hotel, restaurant, and business-management applications. Currently working full-time on a large-scale FinTech-like system, developing backend functionality, building the administrative platform with Laravel Filament, and providing API endpoints for Flutter developers. Strong debugging, analytical, and problem-solving skills with experience understanding existing codebases and maintaining large applications.

TECHNICAL SKILLS

Backend: PHP, Core PHP, Laravel, Laravel Filament, MVC Architecture, RESTful APIs, API Integration, OOP, Eloquent ORM, Blade Templates, Routing, Middleware, Validation, Authentication, RBAC

Database: MySQL, SQL, Database Design, Query Optimization, Relational Database Management

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, Responsive Web Design

Tools: Git, GitLab, Docker (Basic), Postman, Linux, Windows, cPanel

Core Strengths: Debugging, Problem Solving, Performance Optimization, Secure Coding, Application Maintenance, Technical Documentation, Large Existing Codebases, Team Collaboration

PROFESSIONAL EXPERIENCE

Laravel Backend Developer | Full-Time | Intellec It Ltd — 2026–Present

- Work full-time on backend development for a large-scale FinTech-like application with complex business workflows.
- Develop and maintain PHP/Laravel backend functionality, business logic, database operations, and application services.
- Designed and developed the **complete administrative dashboard using Laravel Filament** for managing core application modules and operational workflows.
- Develop and provide **RESTful API endpoints for Flutter developers** and support frontend-backend integration.
- Work with MySQL databases and optimize queries and data operations for application performance.
- Investigate existing code, troubleshoot bugs, identify technical issues, and implement maintainable solutions.
- Contribute to secure, responsive, and reliable application functionality while meeting assigned development requirements and deadlines.

PHP Laravel Developer | EasyLearningBD — January 2022–Present | Remote

- Develop and maintain Laravel/PHP applications for ERP, inventory, POS, eCommerce, SaaS, logistics, and business-management use cases.
- Develop RESTful APIs and integrate third-party services for web and mobile applications.
- Work with MySQL database design, Eloquent ORM, SQL queries, and query optimization.
- Implement backend features using Laravel routing, middleware, validation, authentication, Blade, and MVC architecture.
- Develop interactive functionality using JavaScript, jQuery, AJAX, HTML5, CSS3, and Bootstrap.
- Debug application issues, improve performance, and maintain existing production systems.
- Collaborate with clients, developers, and remote team members to understand requirements and deliver business solutions.

Laravel Developer | BDTask Limited — July 2021–December 2021

- Developed Laravel web application modules following MVC architecture and reusable backend practices.
- Implemented AJAX-based features and contributed to debugging, maintenance, and application improvements.
- Worked with backend and frontend functionality to deliver project requirements.

Web Developer | Jaago Foundation — January 2020–June 2021

- Customized and maintained web applications based on organizational requirements.
- Integrated payment gateways and third-party services.
- Supported application deployment and production environments on DigitalOcean.

SELECTED RELEVANT PROJECTS

FinTech Digital Wallet Platform | Current: Laravel, Filament, REST APIs, Flutter Integration — backend development, business logic, complete administrative dashboard, and API endpoints for Flutter applications.

API-Based SaaS Inventory Management System: Multi-tenant architecture, inventory and sales APIs, user management, RBAC, reporting, and scalable database operations.

Enterprise Resource Planning (ERP): Inventory, Accounts, Sales, Reporting, Admin/Staff role management, and optimized database operations.

Advanced Multi-Vendor eCommerce: Laravel-based platform with AJAX filtering, dynamic product loading, infinite scroll, category and brand filtering, and optimized queries.

POS & Business Management: Practical experience developing and maintaining business applications involving inventory, sales, purchase, and operational workflows.

Additional Systems: Cryptocurrency Platform, API-Based SMS Platform, C&F; Management System, Restaurant Management System, Learning Management System (LMS), Hotel Booking System, and Multi-Language News Portal.

EDUCATION:

Computer Diploma, IST | BSS, Govt. Titumir College | PHP/Laravel, BITM & Udemy.
